Re: UNDERGROUND INJECTION CONTROL (UIC)
Approval of Injection Fluid
Suckla Farms No.1 Class I Well
EPA Permit No. CO1516-02115
Weld County, CO

Dear Mr. Clark:

Based on the data submitted by AET Environmental on June 9, 1997, pertaining to phosphate waste used to phosphate metal for rust prevention, this rinsate solution has been determined by the U.S. Environmental Protection Agency to be classified as a nonhazardous waste. Source of the water is from a tank at B-Line Systems, 21000 E. 32nd Parkway, Aurora, Colorado 80011. This rinsate is approved for delivery and injection into the Suckla Farms No.1 disposal well; estimated volume of rinsate to be disposed of is 2800 gallons.

If you have any questions concerning this letter, you may contact John Carson at (303) 312-6203. Also, please direct all correspondence to the attention of John Carson at Mail Code 8ENF-T.

Sincerely,

Sharon L. Kercher, Director

Re: UNDERGROUND INJECTION CONTROL (UIC)
Approval of Injection Fluid
Suckla Farms No.1 Class I Well
EPA Permit No. CO1516-02115
Weld County, CO

Dear Mr. Clark:

Based on the data submitted by AET Environmental pertaining to the detergent metal cleaning bath solution from Electronics Metal Products, 21000 East 32nd Parkway, Aurora, Colorado, it has been determined by the U.S. Environmental Protection Agency that the fluid is classified as a nonhazardous waste. Therefore, the fluid (estimated volume 6,000 gallons) from Electronics Metal Products is approved for delivery and injection into the Suckla Farms No.1 disposal well. Previous shipments totalling over 15,000 gallons of this same fluid were injected in the Suckla Farms No.1 during 1996 and the early part of 1997.

If you have any questions concerning this letter, you may contact John Carson at (303) 312-6203. Also, please direct all correspondence to the attention of John Carson at Mail Code 8ENF-T.

Re: UNDERGROUND INJECTION CONTROL (UIC)
Approval of Injection Fluid
Suckla Farms No.1 Class I Well
EPA Permit No. CO1516-02115
Weld County, CO

Dear Mr. Clark:

Based on the data submitted by AET Environmental pertaining to cleanout fluids from an underground storage tank (UST) located at the Copper Mountain Conoco station, it has been determined by the U.S. Environmental Protection Agency that the fluid is classified as a nonhazardous waste. UST fluids are also an exempt waste. Therefore, the fluid (estimated volume 1200 gallons) is approved for delivery and injection into the Suckla Farms No.1 disposal well.

If you have any questions concerning this letter, you may contact John Carson at (303) 312-6203. Also, please direct all correspondence to the attention of John Carson at Mail Code 8ENF-T.

(Record of item checked above)

TO: File FROM: V. Carson DATE 3/18/94
TIME 9:00

SUBJECT: Wattenberg Disposal Sockla Farm #1 (CO1516-02115)

SUMMARY OF COMMUNICATION

One-hour meeting with Kevin Kauffman and Kent Gilbert re: reporting requirements, etc for well. Gave Kent reporting forms, MIT, WO, etc. Kent will send copy of Quarterly Rpts to Ed DiMatteo.

They have upgraded facility, relined tanks with plastic coating, painting, etc. Considerable investment to make well facility function properly.

Kevin wants contacts at EPA for:

- 1) Conoco Refinery treats water recovered during refining process and returns water to S. Platte.
- 2) Stapleton Airport clean-up, tank farm & lines. Is this Class I waste?
- 3) Attend Haz-waste session next week?

Letter go to Kent Gilbert - approvals, etc. He will take care of notifying well/site.

CONCLUSIONS, ACTION TAKEN OR REQUIRED

SUBJECT Sockla Fms #1 Class I

SUMMARY OF COMMUNICATION

Ken reported leak. Will call in rig, pull tubing, etc. then do MIT

5/21/97 Ken called: Pulled tubing yesterday, found couple leaks. Will be about 6:00 PM today before they run tubing and do MIT.

5/23/97 Ken called: Pulled tubing, found few pin-hole leaks. Hydrotested tubing going back in hole. Set packer and pressure tested. Pressure went up due to temperature, but held tight. Will send in paper work.

Wright's Disposal, Inc.
Suckla Farms #1 Class I Well
UIC Permit CO1516-02115

Routine Inspection November 4, 1997.
Also a Pressure Falloff Test was conducted by Peterson Energy Management, Inc.

This facility receives and injects only about 400 barrels per week. This includes both Class I and Class II fluids. The well accepts fluids on vacuum most of the time.

Prior to conducting the Pressure Falloff Test, water was injected on vacuum for a period of eight hours at the rate of approx. 40 bbls/hour.

At 2:00 PM ran gauge ring on wire line down tubing string to assure clearance for running bottom hole pressure gauge. Ran in hole with pressure gauge on wire line at 2:50 PM. Set pressure gage in seating nipple on top of packer at 3:15 PM with backup gauge on top. Disconnected wire line and POH and shut-in well. No pressure gauge set at surface since well was on vacuum and would not record any usable data.

Well will remain shut-in for three days, to Friday November 7 in order to let reservoir stabilize and a pressure falloff curve is established.

AET Environmental
4661 Monaco Street
Denver, CO 80216Re: UNDERGROUND INJECTION CONTROL (UIC)
Approval of Injection Fluid
Suckla Farms No.1 Class I Well
EPA Permit No. CO1516-02115
Weld County, CO

Dear Mr. Clark:

Based on the data submitted by AET Environmental pertaining to phosphate waste used to phosphate metal for rust prevention, it has been determined by the U.S. Environmental Protection Agency that the rinsate solution is classified as a nonhazardous waste. Source of the solution is from a tank at B-Line Systems, 21000 E. 32nd Parkway, Aurora, Colorado 80011. This waste is approved for delivery and injection into the Suckla Farms No.1 disposal well; estimated volume of water to be disposed of is 650 gallons now, and again six months later.

If you have any questions concerning this letter, you may contact John Carson at (303) 312-6203. Also, please direct all correspondence to the attention of John Carson at Mail Code 8ENF-T.

Sincerely,

A handwritten signature in cursive script, appearing to read "Sharon L. Kercher".

RE: UIC Approval-Rinsate from
Phosphate Tank Waste
B-Line Systems
21000 E. 32nd Parkway
Aurora, CO 80011

Dear Mr. Carson:

Enclosed is the Profile for the above referenced Phosphate waste from a tank used to phosphate metal (rust prevention). The rinsate solution has a pH of 5.5, and has no hazardous characteristics.

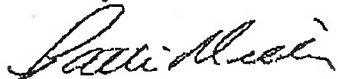

According to RCRA this material contains no hazardous substances, and the material is otherwise non regulated.

I have attached the approval letter for the same waste stream on February 20, 1997.

The total volume of the solution is expected to be approximately 2800 gallons.

Thank you for taking the time to evaluate this request.

Sincerely,

Patti Miller

RE: UIC Approval-Rinsate from
Soap Rinsate tanks
B-Line Systems
21000 E. 32nd Parkway
Aurora, CO 80011

Dear Mr. Carson:

Enclosed is the Profile for the above referenced water rinsate from a tank used to rinse off soap from steel plates. I have also enclosed the previous approval letter for your review. The rinsate solution has a pH of 7, and has no hazardous characteristics. We have disposed of over 10,000 gallons of the soap cleaning bath solution in September and November and March, which was also non-hazardous. We will be disposing of this waste stream approximately once per quarter.

According to RCRA this material contains no hazardous substances, and the material is otherwise non regulated.

The total volume of the solution is expected to be approximately 6000 gallons at this time.

Thank you for taking the time to evaluate this request.

Sincerely,

A handwritten signature in black ink, appearing to read 'Patti Miller'.

Approval of Injection Fluid
Suckla Farms No.1 Class I Well
EPA Permit No. CO1516-02115
Weld County, CO

Dear Mr. Clark:

Based on the data submitted by AET Environmental on April 15, 1997, pertaining to water rinsate used to rinse off soap from steel plates, it has been determined by the U.S. Environmental Protection Agency that the fluid is classified as a nonhazardous waste. Source of the water is from a tank at B-Line Systems, 21000 E. 32nd Parkway, Aurora, Colorado 80011. This water is approved for delivery and injection into the Suckla Farms No.1 disposal well; estimated volume of water to be disposed of is 1000 gallons.

If you have any questions concerning this letter, you may contact John Carson at (303) 312-6203. Also, please direct all correspondence to the attention of John Carson at Mail Code 8ENF-T.

RE: UIC Approval-Rinsate from
Soap Rinsate tanks
B-Line Systems
21000 E. 32nd Parkway
Aurora, CO 80011

Dear Mr. Carson:

Enclosed is the Profile for the above referenced water rinsate from a tank used to rinse off soap from steel plates. I have also enclosed the previous approval letter for your review. The rinsate solution has a pH of 7, and has no hazardous characteristics. We have disposed of over 14,000 gallons of the soap cleaning bath solution in March, September and November, which was also determined to be non-hazardous. We will be disposing of this waste stream approximately once per quarter.

According to RCRA this material contains no hazardous substances, and the material is otherwise non regulated.

The total volume of the solution is expected to be approximately 1000 gallons at this time.

Thank you for taking the time to evaluate this request.

Sincerely,

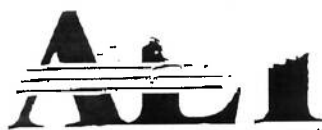

A handwritten signature in cursive script, appearing to read "Patti Miller".

WASTE CHARACTERIZATION DATA SPECIAL WASTE

In order for us to determine whether we can lawfully and safely transport, treat, and dispose of your waste material, we must obtain certain information about the chemical and physical properties of the waste, and its chemical composition and regulatory status. Please be complete and answer each question by circling "YES" or "NO", checking the appropriate boxes, or filling in the blanks. Answers must be in ink or typewritten and the completed form must be signed by the generator. Please attach all available analyses.

Denver, CO 80216Re: UNDERGROUND INJECTION CONTROL (UIC)
Approval of Injection Fluid
Suckla Farms No.1 Class I Well
EPA Permit No. CO1516-02115
Weld County, CO

Dear Mr. Clark:

Based on the data submitted by AET Environmental pertaining to water rinsate used to rinse off soap from steel plates, it has been determined by the U.S. Environmental Protection Agency that the fluid is classified as a nonhazardous waste. Source of the water is from a tank at B-Line Systems, 21000 E. 32nd Parkway, Aurora, Colorado 80011. This water is approved for delivery and injection into the Suckla Farms No.1 disposal well; estimated volume of water to be disposed of is 500 gallons.

If you have any questions concerning this letter, you may contact John Carson at (303) 312-6203. Also, please direct all correspondence to the attention of John Carson at Mail Code 8ENF-T.

Sincerely,

Sharon L. Kercher, Director
